

Please, Please, please, make the food services aware they are causing us disappointment, frustration and leaving us hungry. We are staff involved in providing patient care and we are not being taken care of by our food services.

We need vegetarian HOT food choices for breakfast which will be available at CRC coffee bar until 10:30 am, and also we need vegetarian hot food choices for lunch that are NOT only pricey hot food bowls, but also more affordable sandwiches. Currently ,there are only cheeseburgers and hamburgers available for lunch and no veggie burgers or even fish burgers!

Please forward my email to whoever has power to change the existing state of affairs with the food choices and I will appreciate it very much!
